

Abstract of the Disclosure:

A device for ironing items of clothing having sleeves, especially, shirts and blouses, by an ironing dummy includes an inflatable bag placed inside the item of clothing when 5 ironing and reaching into the cuffs of the clothing item. To be better able to smooth out the sleeves when ironing, the end of the inflatable bag in the region of the cuffs is provided with a reinforcement that fixes the end of the sleeve and exercises a longitudinal pull on the sleeve during inflation 10 of the inflatable bag. An inner clamping mechanism is disposed inside the cuff for the fixing process.
